

# **SHBxR Self-Aligning Accessories**

#### **FEATURES**

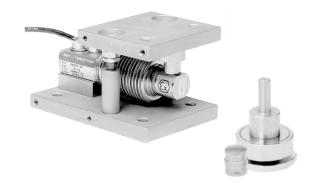

- Capacities: 5-500 kg
- Hardened components at all load bearing surfaces
- Rocker pin load introduction
- Built-in horizontal movement control and lift-off protection
- Load cell (re)placement after installation of the mount
- Optiona
  - Stainless steel or nickel-plated steel versions available
- Stay rod assembly

#### **APPLICATIONS**

- Process control
- · Batch weighing
- Silo/hopper weighing
- · Belt scale weighing

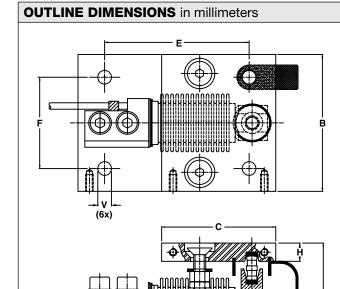

#### **DESCRIPTION**

The SHBxR self-aligning silo mount, combined with the SHBxR load cell family, provides weighing assemblies suitable for process control, batch weighing, silo/hopper, and belt scale applications.

The SHBxR foot assembly is an ideal solution for low and medium capacity platform scales. The SHBxR mount and foot are based on a rocker pin design, combining excellent load introduction to the transducer with an overall low profile.

Hardened components are used at all load bearing surfaces. The stainless steel construction guarantees long-term reliability, even in the harshest environments.

## SHBxR Self-Aligning Accessories

#### **ACCESSORIES**

#### **Self-Aligning Mount**

The SHBxR mount permits controlled horizontal movement in all directions. The design allows the load cell to be (re)placed after installation of the mount. The critical load introduction area is mechanically protected.

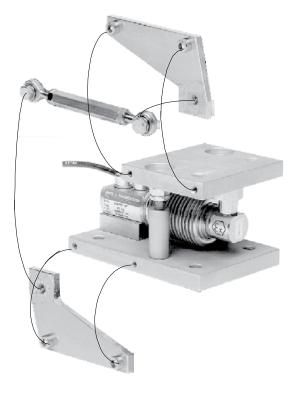

### **Height Adjustable Foot**

The stainless steel foot, which has 5 mm of adjustment, provides excellent load introduction to the transducer. The foot allows flexibility in platform design without compromising overall system performance.

#### Stay Rod Assembly

If major load movement is anticipated stay rods should be used to restrain a vessel or platform. The SHBxR stay rod assembly can be bolted to the mount prior to or after its installation.
